

trim_galore_PE
sample: parent1

```
graph TD; A["trim_galore_PE<br/>sample: parent1"] --> B["quality_control_trimmed<br/>sample: parent1_R1_val_1"]; A --> C["all"]; B --> C;
```

The diagram illustrates a data processing workflow. It starts with a green dashed box at the top left containing the text 'trim_galore_PE' and 'sample: parent1'. Two arrows originate from this box: one points to an orange dashed box on the right containing 'quality_control_trimmed' and 'sample: parent1_R1_val_1', and the other points to a green dashed box at the bottom left containing the word 'all'. An additional arrow points from the orange dashed box to the same green dashed box at the bottom left.

quality_control_trimmed
